Ecosystem Services Pipeline

From ecosystem accounts and economic data to physical and monetary supply tables

INPUTS

Extent Accounts
Area per ecosystem type (ha)

Condition Accounts
Ecosystem health (CI 0-1)

Economic Data
Prices, costs, revenues

Literature Rates
NCP rates, value transfer

SERVICE TYPES

Provisioning

- Fish and shellfish harvest
- Mangrove wood and fibre
- Seaweed / aquaculture

Regulating

- Carbon sequestration
- Coastal protection
- Nursery habitat support
- Water purification

Cultural

- Tourism and recreation
- Gleaning (subsistence)
- Cultural and spiritual

VALUATION METHODS

Resource Rent
Revenue minus costs

Social Cost of Carbon
$51/tCO2 (US EPA)

Replacement Cost
Cost of built alternative

Direct Expenditure
Actual spending data

Value Transfer
Apply rates from similar sites

OUTPUTS

Physical Supply Table
Service x ecosystem type x quantity (kg, Mg CO2, visits, km)

Monetary Supply Table
Service x ecosystem type x value ($/yr)
