From Accounts to Policy

Three account types feed six policy instruments

ACCOUNTS

☐ Extent Account

Area (ha) of each ecosystem type and changes over time

★ Condition Account

Indicator scores normalized to 0–1 against references

♦ Services Account

Physical flows and monetary values of ecosystem services

WHAT THEY TELL YOU

- ▶ Are we losing or gaining ecosystem area? Where?
- ▶ Is ecosystem health improving or declining? Which indicators?
- ▶ What is the economic contribution? Who benefits?

POLICY INSTRUMENTS

🌍 SDG 14 Reporting

Track progress on ocean targets

Extent + Condition

🌱 NDC / NBSAP

National climate and biodiversity commitments

All three accounts

⚓ Marine Spatial Planning

Zoning and use allocation decisions

Extent + Services

★ Blue Finance

Blue bonds, debt-for-nature, PES

Services (monetary)

▲ MPA Management

Effectiveness monitoring and adaptive management

Condition + Extent

◆ Blue Economy Strategy

Sustainable ocean economic planning

All three accounts

★ Build once, report everywhere.

All Ocean Accounts Connect to Policy

One integrated framework serves all policy needs

COMPILE ONCE, REPORT MANY

Ocean Accounts is one integrated dataset built on a shared spatial framework. The same data serves SDG 14 reporting, marine spatial planning, climate commitments, blue finance, and national ocean policy.

ALL ACCOUNT COMPONENTS

☐ Ocean Economy (OESA)

GVA, employment, and trade by ocean sector

★ Ocean Tourism (OTSA)

Tourism expenditure, visits, and revenue by coastal zone

♦ Waste & Emissions

Pollution loads, solid waste, and greenhouse gas flows

▲ Social & Governance

Wellbeing, livelihoods, equity, and cultural connections

POLICY INSTRUMENTS

Blue economy strategy

Investment decisions, Sector planning, SDG 8

Ocean Economy (OESA)

Tourism master plans

Coastal zone management, Revenue projections

Ocean Tourism (OTSA)

Pollution regulations

SDG 14.1, MARPOL compliance, Waste management plans

Waste & Emissions

Equity & community policy

FPIC, Co-management, Distributional analysis, Community engagement

Social & Governance

★ One integrated ocean accounting framework serves all policy needs. Build the accounts once, apply them across multiple policy instruments.
